vinyl flooring
made of
solid
material

Good reasons for vinyl flooring made of solid material

Vinyl flooring made of solid material is robust and easy to maintain and thanks to its water resistance is specially suited to rooms which are exposed to moisture. Its low installation height makes it the ideal renovation solution where every millimetre counts and thereby rounds off its application possibilities. Vinyl flooring made of solid material can be quickly and easily laid owing to its intelligent click system.

Quiet and warm underfoot

Robust and low-maintenance

Antibacterial and hygienic
