Engineered
wood
flooring

We combine awareness for quality with a feel for the times in which we live. Our engineered wood flooring range has grown in this way: sophisticated products that show the material of wood in the perfect light.

Every plank is a unique specimen, every floor a character piece: its feel and natural warmth make Parador engineered wood flooring an experience for the senses. Exclusive in terms of appearance and choice, high quality in its composition and easy to install, it opens up individual design freedom – and survives generations.

Engineered wood floors are low in emissions, ensure a pleasant living environment and make an active contribution to climate protection. Uncompromising manufacturing perfection and a claim to creative leadership in interior design – that is what sets us apart at Parador.

living

Living performance

is the core of the Parador brand. For us, living means appreciating beauty. Performance is precisely that. Parador combines both at the highest level – and prepares the ground for individual living spaces.

performance

**Art of living
meets performance**

The world is changing. Increasingly complex challenges and multi-faceted impressions create surprising movements, ultimately fashioning a new dimension to the value of home living.

People who deal with forms of individual living and identify with their home in a new way turn into communities, who take care with their home surroundings.

The criteria by which the quality of life and living are re-evaluated are changing. Parador products make a sustainable contribution in this regard. In them, beauty, design and technology, worth and longevity are combined to form a perceptible and emotional basis that withstands the demands of everyday life.

In this respect, our aim is to earn the trust of our customers for everything that we do – with clear values and a clear attitude: we are genuine, innovative and ambitious. We are proud of combining valuable home living with artistic life through what we do.

Living performance.

1. Our attitude is a clear compass that points to the future.

2. Inspirations from art, architecture and society give our products character and personality.

3. The highest standards of quality “made in Germany and Austria” are the foundation and drive for our work.

4. An innovative spirit and excellent technology lead to results and awards recognised worldwide.

5. Our floors promote healthy living, are low on emissions and create a pleasant living environment.

6. Sustainability is our foundation and goes hand in hand with our responsibility to preserve nature for the next generations.

6

The world may be speeding up – we live for lasting products that survive our times. Our real wood floors are the best evidence of this. Their timeless elegance results from the fact that they withstand life, develop a unique character and tell increasingly valuable stories. Parador engineered wood flooring, that is an appreciation in value through quality – also for generations to come.

Not all engineered wood flooring is the same. Our manufacturing process is characterised by high-quality raw materials, sophisticated technology and the experience of the people at the Güssing and Coesfeld sites. Expertise, flair and experience made in Germany and Austria allow products to be created that never go out of fashion. Even the structure of Parador engineered wood flooring is durable and dimensionally stable: we use a solid middle layer made of softwood, a stable counter layer and a top layer made of high-quality real wood, which are also equipped with a lacquered or naturally oiled surface – value retention guaranteed.

Innovation hub and material workshop, trendsetter and design leader: Parador is as *versatile* as the products for which the company stands.

On the following pages we show what makes our wide offer so special: a *declaration of love* to the possibilities of customised room interior design with Parador engineered wood flooring.

7

a, b Parador products are a homage to nature: its inspiring force is the best basis for our customers' homes.
 c Real wood tells emotional and meaningful stories without words – yet formed with character over decades.
 d, e At our sites in Coesfeld and Güssing, unique engineered wood flooring is created with plenty of flair.

“Expertise, attentiveness and responsibility are firmly anchored in our understanding of quality.”

We are never frivolous when it comes to handling the valuable resource that is wood. For the production of engineered wood flooring we use timber from sustainable forestry, purchase materials from Europe and do not use any tropical timber. Parador engineered wood flooring promotes healthy living. The latest technology at the Güssing site also enables us to be particularly prudent in our use of natural resources. This active contribution to climate protection and our claim to have a transparent, committed environmental management system is regularly certified by leading institutes.

We think like a cottage industry – and combine this attitude with production excellence across the board. By combining wood types and colours, grains and textures, assortments and finishes, real wood floors are created that are as individual as the life plans of our customers. Fascinating products with a fascinating feel, collections designed down to the last detail: that is our claim and at the same time our commitment, because expertise, attentiveness and responsibility are firmly anchored in our understanding of quality.

The dimension of selection options is the result of many years of competence in design and craftsmanship, which are repeatedly reconfirmed by the growing demand and our collaborations with the relevant architects of our time.

 Trendtime 6
European maple grey
Vintage sawn texture
 Living
 extra matt lacquer

European maple grey is the contemporary interpretation of a classic in strip flooring design. The exclusive grey shade gives the wood type a completely new optical facet. At the same time, the vintage sawn texture and light liming allow a unique grid look to emerge on the plank – for an elegant, extraordinary floor.

Engineered wood flooring

If it is a matter of genuineness, a warm homely feel and outstanding haptic qualities and designs, Parador engineered wood flooring is a real classic among *particularly durable floors*.

Timeless and modern at the same time, due to its material quality, real wood is an essential part of sustainable and high-quality interior design. The refined impression of the surfaces of Parador engineered wood flooring is shaped by current influences from art and design, architecture and *lifestyle*.

With Parador engineered wood flooring, the valuable material that is wood is shown off perfectly – in a large variety and in four product lines.

The following is true for all collections: Parador Engineered wood flooring stands for a positive room climate, for health in the home and warmth: for quality and design that survives generations.

Parador real wood floors offer a large choice of engineered wood flooring in four collections. The Basic, Classic, Trendtime and Edition collections are aimed at different target groups. They have one thing in common: they give rooms a special atmosphere – and stand for healthy living and value retention, across generations.

Basic

is our collection for all those who are price-conscious but do not want to forego quality: in the Basic line you will find an impressive selection of attractive engineered wood floors, which turn any house into a real home.

Page 24

Classic

is uncompromising in terms of quality, classic in its design and always a stylish basis for valuable home living. The Classic line is aimed at people with a high standard of design and quality.

Page 32

Trendtime

delights all those for whom the flooring is an expression of their attitude: the line combines a unique design spectrum for stylish furnishing in pace with the time with worth at the highest level.

Page 48

Edition

combines exclusive special collections – shaped by international trends and cultural influences. Created by Parador itself and working together with renowned designers, the floors stand for unique design quality alongside the highest functionality.

parador.de/en/design-collection

Iconics Our passion lifts the work on the product from rationality to the level of sensuality. In the product world, uniqueness is increasingly important: products with soul. We take this conviction into account with our new “Iconics” products. They are modern signs with iconographic potential – bold, extraordinary and at the same time relevant to the design of beautiful spaces with a special character.

The prevention of emissions and the return of recyclable materials into the production cycle, short transport routes and the use of natural and near-natural materials are what characterise Parador: using our expertise, we offer engineered wood flooring that comes from sustainably managed forests and controlled sources of supply.

Find out more about this on Page 72.

Despite its suitability for everyday use, Parador Engineered wood flooring loses nothing of its natural charm – for all those who love real wood and rightly expect that its type and surface harmonise with the individual furnishing and life style.

 Iconics

Lightness, light and sun: on Parador Iconics Indian Breeze, the dimensions of unlimited design options are demonstrated in a perfectly handcrafted engraving.

L 2200 x W 185 x H 13 mm

“Wood, in conjunction with handcrafted perfection and design, becomes a work of art that shapes the floor.”

The feather embodies lightness and symbolically combines the power of light and sun with the strength of all that is natural. The flooring Indian Breeze, which emerged from this inspiration, presents itself in a light and buoyant manner.

The dimensions of unlimited design options are demonstrated on it in a perfectly handcrafted engraving.

Trendtime 8
Beech elephant skin
Classic
natural oil plus

Modernly interpreted beech impresses with its intensive and rounded brushing as a genuine barefoot flooring with a unique feel. The combination of the striking texture, a special filling technique and the natural oil surface make this traditional wood type appear in a modern residence – and give it a stand-alone, contemporary character.

No two engineered wood floors are the same. Yet as wide as our range of textures and assortments, planks and colours is, all Parador engineered wood floors have one thing in common: they combine stability, craftsmanship and natural beauty to make a floor for generations.

Parador engineered wood flooring

Parador engineered wood floors are particularly dimensionally stable thanks to their three-layer composition. The solid middle layer made of softwood and the stable counter layer form a solid basis for the durable top layer made of high-quality hardwood. Our floors are quick and easy to install due to the patented click mechanism.

The lamella impregnation on the end side as well as the all-round impregnated top layer ensure enhanced swelling protection. The planks are given a lacquer or natural oil surface finish – for a permanently beautiful floor.

parador.de/en/your-floor/product-knowledge

Wood is a natural product and every plank is a unique specimen.

All-round lamella and top-layer impregnation for enhanced swelling protection

Suitable for installation on underfloor heating

Automatic-Click System with long and end edge locking*

- 1 Top layer
- 2 Softwood middle layer
- 3 Counter layer
- 4 Click connection

More than a surface

Due to the different surface treatments, the character of the wood material is tangibly accentuated. For instance, in the case of our Elephant Skin surface texture, grains, knots and cracks are brought out; in the case of the brushed texture, stainless steel brushes are used for an authentic feel.

Handscraped surfaces are given an original character by being planed by hand.

Handcrafted generates discreet features; the sawn texture and vintage sawn texture, which in addition reveal textures running lengthways, stand for an archaic look.

The soft texture impresses by means of a deep, intensive brushing process with soft transitions. For valuable home living down to the last detail.

Bevel design

When installing flooring **without a bevel**, the planks are joined together without noticeable gaps, which creates a harmonious installation pattern.

In the case of the **4-sided bevel** and the **mini bevel**, the all-round bevelled edges underline the natural quality of the floor, whereas the 4-sided bevel emphasises the planks more.

Our finishes

With Parador you can choose between natural oil, natural oil plus and a multi-layered lacquer finish. Whether you opt for lacquer or natural oil engineered wood flooring, is (almost) purely a matter of taste. Here are the benefits at a glance.

natural oil

The natural character of the wood is shown off. Its own patina develops with optimal protection.

white natural oil

In addition to natural oil: adjustment of colour and textural nuances in the wood by white colouring.

natural oil plus

The special protection allows for a fuller feel with improved safety and performance for a home-ready floor.

white natural oil plus

In addition to natural oil plus: adjustment of colour and textural nuances in the wood by white colouring.

lacquer

The refined, satin gloss lacquer surface offers optimum protection against dirt and stress.

matt lacquer

The protective matt lacquer with the natural matt look of an oil treatment emphasises colour and texture.

white matt lacquer

In addition to matt lacquer: adjustment of colour and textural nuances in the wood by white colouring.

extra matt lacquer

The extra matt lacquer finish impresses with an even matter gloss level.

extra matt lacquer professional

The lacquer finish suitable for the contract sector combines the best possible long-term protection with an extra matt look. A high-performance seal for all intensively used areas.

Well sorted

Not only the type of wood determines how the flooring looks, but also the assortment. Wood shows off the most varied traits from **harmonious** (Select) to **balanced** (Natur), **vibrant** (Classic) and **lively** (Living) through to **particularly original** (Rustikal).

Underlays

Parador floors can be optimally installed for any application: our underlays even out small bumps and at the same time provide high compressive strength. With an integrated moisture barrier, the right product ensures the necessary moisture protection in case of mineral substrates.

parador.de/en/services/faq/underlays

Service with system: A perfect overall impression is down to the detail. That is why Parador provides exactly matching accessories for installation and care – for the joy of flooring. From the start.

Tools

Parador floors can be easily installed with few additional tools: parador.de/en/your-floor/product-knowledge/engineered-wood-flooring

Skirting boards

Parador offers a wide range of optically matching skirtings for a harmonious look to any product. Alternatively, the colours stainless steel, white and black or a primed surface for customised painting, give the opportunity to deliberately accentuate. Parador skirtings impress due to their easy fitting with clip technology (optional adhesive in adhesive groove). Our choice of caps rounds the range off. Simply perfect!
parador.de/en/skirtings-accessories

Profiles

Parador profiles bridge, connect and create finishes for the perfect flooring aesthetics. As transition profiles, they connect floor coverings of the same height and provide the necessary expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles and doors. Stair edge profiles ensure durable transitions on steps.

Cleaning and maintenance

When it comes to cleaning and maintenance, our accessories continue the high quality line of the Parador floors down to the last detail: Parador care accessories ensure a particularly long life cycle.
parador.de/en/your-floor/product-knowledge

Repair

With the Parador premium repair set, minor damage is soon rectified – because taking joy in our products for a long time is close to our hearts, even if some slight damage to the flooring is incurred from time to time.
parador.de/en/your-floor/product-knowledge

We act sustainably, take responsibility for the future and are committed to bringing the environment, social issues and responsible business practices in *perfect balance*.

When it comes to manufacturing products that are healthy in the home, we use tested raw materials. During the manufacture of all Parador products, besides wood we use other high quality, recyclable and environmentally-friendly materials from monitored sources; engineered wood flooring is, of course, produced by us using timber from sustainably managed forests.

We are continuously certified by independent institutions. Production, materials and products from Parador go beyond statutory requirements when it comes to meeting the value standards of a brand with responsibility. We are the first and only flooring manufacturer in Germany to be EMAS-certified since 2015: EMAS is the most demanding system worldwide for environmental management.

We are committed to our particular responsibility for the environment. Wood is sustainable and actively contributes to climate protection. Once installed, all Parador products are characterised by a long life cycle. Where we can, we use materials that can be easily reused in terms of energy and material.

Plant-for-the-Planet. Since 2011 Parador has been a partner of the "Plant-for-the-Planet" foundation, which campaigns worldwide for reforestation and climate justice. We support the initiative with tree-planting campaigns, as a result of which almost 200.000 trees have been planted by Parador alone.

Real Wood
The "Real Wood" seal is only applied to solid and multi-layer real wood floors, which guarantee the authenticity of the product.

eco-INstitut
Products with this seal meet the most stringent pollutant and emission requirements prescribed by the eco-INSTITUT.

Der Blaue Engel (The Blue Angel)
"Der Blaue Engel" certifies that Parador products are low on emissions based on the current award principles.

EPD
An EPD (Environmental Product Declaration) is based on ISO 14025, the core element of which is the ecological assessment, in which the entire life cycle of a product is disclosed.

FloorScore®
FloorScore® is one of the best-known American certification programs that certifies floor coverings and related products for compliance with indoor air emissions.

PEFC™
This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

TÜV Rheinland
The TÜV test mark confirms independent monitoring of the quality, production and functionality of the products.

Émissions dans l'air intérieur (Klasse A+)
This national classification valid in France indicates the quality of indoor air.
